

## Young Men Drifting

ALBUM (LP, CD & digital download)

## DANS LA TENTE

With their album *Young Men Drifting*, Dans La Tente set out to create a euphoric sound with seeming ignorance of established rules. The band always goes its own way on their albums and pays a humble tribute to the spirit of independence. This is demonstrated on *Young Men Drifting* with eight fantastic songs which spring from the roots of Dream-Pop and New-Wave.

Taking the album track by track. The opener *Gravity* is a celebration of weightlessness with an all-pervasive false sense of security. *Cold Needs* sets the voices of Barmettler and Laureijs to music to produce a piece of androgynous New-Wave. Next up, *Desires* steers the sound towards an engaging pop. This is followed by *Shaky Places* which sees you catch a glimpse of your own sublime reflection in the mirror of yourself.

*Young Men Drifting* is the title track and opens Side 2 (on the vinyl LP edition) with a confession. With *Zoomer*, the band settles into a cool groove, oblivious to the diktats of the mainstream. *Now & Odd* brilliantly outwits expectations and lets the band produce a friendly sign-off. With *Modern Hearts* Dans La Tente draw the album to a close, giving their own personal take on how to interpret pop music today.
